**Magnetotherapy**

It’s a long time that low frequency and high intensity pulsed electromagnetic fields have met maximum scientific consent in chronic and degenerative diseases treatment.

Magnetotherapy uses low frequency and high intensity pulsed electromagnetic fields induced by electric current on a bobbin; due to its characteristics, the electromagnetotherapy is universally recognized as the most suitable technique for the treatment of the bony pathologies, in particular for the osteoporosis.

Pulsed electromagnetic fields induce biological modifications on biological membrane, cells and blood vessels with different therapeutic effects: antiflogistic, antiedemigen and tissue repair. In general magnetotherapy assures a good biostimulation in order to re-establish correct cellular functions.

According to different authors experiences in osteoporosis a considerable disease regression is evident from the sixth treatment and moreover it’s evident an important increase of BMD (Bone Mass Density).

MAG700 is a single channel device, it’s very easy and intuitive to use with a high prices/performance ratio.
I.A.C.E.R. Srl. is an Italian medical devices manufacturer (CE medical certificate n° MED24021 issued by Cermet notified body n° 0476).

Declaration of conformity

Notified body: Cermet, Via di Cadriano 23 – 40057 Cadriano di Granarolo (BO) Italy.

Certification Path: Annex II.

MAG700 is a Class IIa equipment, with reference to Directive 93/42/EEC (MDD), annex IX rule 9 (and following modifications).

Martellago, 25/11/10

Legal Representative

Mario Caprara
Specifications

MAG 700 has the following specifications:

• Class IIa equipment (Directive 93/42/CEE, Annexed IX, rule 9 and following modifications);
• Class II applied part type BF (Classif. CEI EN 60601-1);
• Equipment not protected against liquid penetration;
• Equipment and accessories not subjected to sterilization;
• Use of the equipment is prohibited close to flammable substances or in environments with high concentrations of oxygen;
• Continuous operating mode equipment;
• Equipment not suited to be used in external.

Purpose

Clinical purpose: Therapeutic
Use: Clinical/Hospital and domestic use

MAG700 is indicated for the treatment, rehabilitation and functional recovery of the following pathologies:

• wrist, hand, shoulder, foot, ankle and knee articulation
• skeletal motor apparatus
• arthrosis
• atrophies and muscular dystrophy
• bursitis
• bruises
• degeneration of locomotor apparatus
• sprains
• neuralgias
- periarthritis
- benign lesions and muscular tears
- tendinitis

MAG700 is particularly suitable for the treatment and the care of the osteoporosis and all the pathologies on bony tissue, for dermatologic applications (varicose ulcers, phlebitis ulcers, arteropatic ulcers, burns, not healed wounds: in these cases we recommend a low treatment intensity, lower than 40). Moreover the device is indicated for tissue reconstruction.

Cellulite treatment is not inserted in the CE0476 marking of the device device. Cellulite treatment can be used only for beauty purposes.

Thanks to its high magnetic field intensity MAG700 is particularly suitable for the treatment of bone fractures also with rigid bandages or braces.

MAG700 device is indicated both for professional (physiotherapists, medics etc.) and for domestic user. **In case of home therapy we recommend using the device exclusively on medical/therapist suggestion.**

**Expected lifetime: 5 years**

Kit contents

MAG700 contains:
- N°1 MAG700 device;
- N°1 power supply;
- N°1 user and maintenance manual;
- N°1 elastic therapeutic belt with 2 solenoids (not inspectionable);
- N°1 carriage bag.

Moreover therapeutic solenoids couple, magnetotherapy carpet and the mattress OSTEOMAT 700 are available as accessories. Visit website www.iacer.it to obtain more information.

How to use

Warnings

Please read carefully the user manual before using MAG700.

We recommend to visit magnetotherapy section on website www.iacer.it in order to obtain other information.

Take care of what follows:
- Take care of position and meaning of the labels on MAG700;
- Do not damage the therapeutic belt acting on connection cable and avoid to roll up the cable around the belt or the device;
- Check the integrity of the power supply before use. Avoid the use in case of damage to the case or to the wire;
- Avoid the use of MAG700 to people not educated through the reading of the manual;
- Avoid the use of MAG700 contemporary with ointments containing free ions of magnetic metals;
- Do not use the device in damp environments or in presence of inflammable agents;
- Do not wear metallic objects during therapy;
- Take care to place the green side of the therapeutic belt on the skin;
- Use only cables and applicators supplied by the Manufacturer. Inadequate cables and applicators could damage the device and/or could be hazardous for the patient;
• The user must periodically verify cables and applicators insulation and control their integrity (eventually by contacting the manufacturer);
• The user must periodically verify cables and applicators insulation and control their integrity (eventually by contacting the manufacturer).
• In case of prolonged treatments (even up to 8 hours) we suggest to use intensity lower than 40. In this case the efficacy is given by the prolonged treatment time rather than maximum adjustable intensity;

WARNING. Disconnect the power supply from the main after each treatment.

The manufacturer is considered responsible of the performances, reliability and safety of the instrument only if:
• Possible additions, changes and/or reparations are effected from authorized personnel.
• The electric plant of the environment in which MAG700 is inserted it is conforming to the national laws.
• The instrument is employed in conformity to the instructions contained in this manual.

Electromagnetic interference

The device doesn’t produce and doesn’t receive interferences from other equipments. However it’s opportune to use the instrument keeping it at least at 3 meters from televisions, monitors, cellular telephones or any other electronic equipment.

Contraindications and side effects

Patient in pregnancy, tuberculosis, juvenile diabetes, viral (in acute phase) illnesses, mycosis, cardiopathic subjects, tumours, serious arrhythmias or pacemaker carriers, children, metallic prosthesis carriers, acute infections, epileptics (different medical prescriptions excepted).

No significant side effects are known of, nor are reported particular contraindications for excessive time length using the device.

Quick use of the device with presetted parameters

We recommend to read the following instructions for an easy and quick use of MAG700:
1. Connect the applicator to the device, by connecting the applicator cable to the plug (CH1) placed on device upper side;

2. Connect the power supply cable to the main, then connect the power supply plug to the circular connector placed on device upper side, near to ON/OFF switch;

3. Connect the power supply plug to the main (110-230 VAC, 50-60 Hz);

4. Move the ON/OFF switch, placed on device upper side, to the ON position: I-TECH logo and programs menu will be displayed on screen;

5. Select the therapy program running through programs menu, using ▲ and ▼ buttons and put yourself on desired program;

6. Press OK. Screen will display base setting with therapy time (2 hours) and magnetic field intensity (40 int.). These mean values are recommend by IACER in order to start immediately the treatment.

7. Press ▼ button highlighting magnet icon on left down position;
8. Press OK key. The device will start the treatment and on screen will be displayed the magnet icon with magnetic field flux. Display green light indicates that therapy is running.

9. At the end of therapy the screen will display automatically the menu programs.

Attention: it’s possible to stop temporary the therapy at any time pressing OK key at least for 2 seconds. Press again OK key to continue the treatment. During pause time green led turns off till the treatment restarts.

Attention: it’s possible to get out from the treatment at any time pressing once key: screen will display the base setting (step 6). By pressing again key screen will display the programs menu (step 5).

Attention: MAG700 recognizes applicators correct connection. During the treatment screen displays connection state under the magnet icon. The presence of symbol near to the written Load is an indicator of correct connection and applicator recognition. The symbol near to the written Load indicates a not correct connection of applicator, or its absence or even its incorrect functioning (see “Functioning control” paragraph).

**Therapeutic belt and solenoids couple positioning**

Here below a list of main positions for the therapeutic belt and for the solenoids couple.

Wrap the belt around the area to be treated (or position the belt on the area, for example in vertebral column treatment). During this phase take care to place the green side of the therapeutic belt on the skin.
The professional solenoids couple have to be placed in opposite positions on the area to be treated. Also in this case take care to place the green side of the therapeutic belt on the skin.
Suggestions for a correct use:

- Do not adjust intensity higher than 50 if you use magnetotherapy carpet (optional accessory) for prolonged treatments;

- In case of night treatment do not use intensity higher than 50 with the applicator placed under blankets/duvets.

Adjustable programs instructions

With MAG700 you can adjust time therapy and magnetic field intensity parameters as indicated in the following steps:

1. Connect the applicator to the device by connecting applicator cable to the plug placed on device upper side;

2. Connect the power supply cable to the main, then connect the power supply plug to the circular connector placed on device upper side, near to ON/OFF switch;

3. Connect the power supply plug to the main (110-230VAC, 50-60 Hz);
4. Move the ON/OFF switch, placed on device upper side, to the ON position: I-TECH logo and programs menu will be displayed on screen;

5. Select therapy program running through programs menu using ▲ and ▼ buttons and put yourself on desired program;

6. Press OK. Screen will display base setting with therapy time (2 hours) and magnetic field intensity (40 int.). These parameters can be modified as follows:

   a) Press OK button: screen displays a moving key icon on the left side;

   b) Press ▲ and ▼ key to adjust the desired therapy hours (from 0 to 24) and confirm by pressing OK key. Screen will highlight the therapy minutes;
c) Press ▲ and ▼ key to adjust the desired therapy minutes (from 0 to 59) and confirm by pressing OK key. Screen will highlight treatment intensity;

![Screen showing therapy settings]

d) Press ▲ and ▼ key to adjust the treatment intensity and confirm by pressing OK key;

7. Display will show the step 6 screen highlighting the key icon on the left side: press ▼ key to highlight the magnet icon;

![Screen showing magnet icon highlighted]

8. Press OK: the device will start the treatment displaying on screen the magnet icon with magnetic field flux. Green light indicates that therapy is running.

![Screen showing therapy in progress]

9. At the end of therapy the screen will display automatically the menu programs.

**Attention:** it’s possible to stop temporary the therapy at any time pressing OK key at least for 2 seconds. Press again OK key to continue the treatment. During pause time green led turns off till the treatment restarts.
Attention: it’s possible to get out from the treatment at any time by pressing once key, screen will display the base setting (step 6). By pressing again key screen will display programs menu (step 5).

Attention: MAG700 recognizes applicators correct connection. During the treatment screen displays connection state under the magnet icon.

The presence of symbol near to the channel number indicates correct connection and applicator recognition. The symbol near to the channel number indicates a not correct connection of applicator, or its absence or even its incorrect functioning (see “Functioning control” paragraph).

*Autoscan program allows to adjust the desired therapy time then it will start automatically a frequency cycle from 10 Hz to 100 Hz with a time therapy of 5 minutes for each frequency. It’s an ideal
program for the regeneration of both hard tissues (bones) and soft tissues (tendons, ligaments) in the same treatment.

Therapy duration values are recommended by I.A.C.E.R. S.r.l. however the user can adjust the time as he prefers. MAG700 uses therapy time values, working frequency values and field intensity values coming from scientific and medical literature, as result of well known sperimentations and clinical evaluations (Barker - Lunt 1983, Bassett – Pawluk – Pilla 1974, Bassett - Valdes – Hernandez 1982).

**Set up (language selection)**

Move the ON/OFF switch, placed on device upper side, to the ON position. Immediately after keeping pressed the button until the language list appears on the display. Release the button: select the chosen language by using the buttons. Press OK key to confirm your selections.

**Maintenance**

**Functioning control**

Mag700 equipment offers a magnet in order to control the device functioning.

**Control procedure:**
1. switch on the device in according to user manual safety prescriptions;
2. start a treatment in according to user manual instructions;
3. get the magnet and put it near to applicator;
4. check magnet vibration (it will be proportional to selected treatment frequency).

*Please contact the manufacturer in case of magnet vibration absence.*

**Cleaning**

*Clean the equipment from the dust using a dry soft cloth.*
Resistant stains can be removed using a sponge soaked in solution of water and alcohol (20%).

We recommend to disconnect the applicator from the device before cleaning the elastic therapeutic belt with 2 solenoids. Clean the tissue using a dampened cloth with water and mild soap and wait for the complete drying before using the applicator.

We recommend to disconnect the applicator from the device before cleaning the circular cases of professional solenoids couple.

- Open the circular cases through lateral zip and extract the professional solenoid.
- Clean the tissue using water and mild soap and wait for the complete drying before reconnecting the applicators.

ATTENTION: always respect the applicators polarity paying attention to insert the bobbins with the side indicated by + symbol turned to the green side of elastic belt (therapeutic side).

Carriage and storage

Carriage precautions

MAG700 is a portable device, so it does not need any particular carriage precautions.

However we recommend to put away MAG700 and its accessories in their own bag after every treatment.

We recommend to not roll up power supply and applicators cables.

Storage precautions

MAG700 is protected till following environmental conditions:

**Disposal**

The equipment is subjected to WEEE regulations (see the symbol on the label) concerning separate waste collection: when disposing this product, please use the designed areas for disposing electronic waste or contact the manufacturer.

**Troubleshooting**

If it is used in accordance with the instructions of the user manual, MAG700 does not need a particular regular maintenance.

If you find any malfunctioning using MAG700, please follow these instructions:

• check the main integrity by connecting a running device to the same main;
• check the connection with power supply and connection cables integrity;
• check the correct connection between MAG700 and the applicator;
• check all the operations have been done properly;
• every two years we suggest a complete check of device (contact the manufacturer or locator dealer).

If you find any problems contact immediately the National Distributor or the manufacturer at the following address:

I.A.C.E.R. S.r.l.
Via S. Pertini, 24/a • 30030 Martellago (VE)
Tel. 041.5401356 • Fax 041.5402684
**Assistance**

Every intervention on device must be performed by manufacturer. For any assistance intervention contact the National Distributor or the manufacturer at the following address:

<table>
<thead>
<tr>
<th>I.A.C.E.R. S.r.l.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Via S. Pertini, 24/a • 30030 Martellago (VE)</td>
</tr>
<tr>
<td>Tel. 041.5401356 • Fax 041.5402684</td>
</tr>
</tbody>
</table>

You can get any technical documentation on spare parts but only prior business authorization.

**Spare parts**

For original spare parts contact the National Distributor or the manufacturer at following address:

<table>
<thead>
<tr>
<th>I.A.C.E.R. S.r.l.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Via S. Pertini, 24/a • 30030 Martellago (VE)</td>
</tr>
<tr>
<td>Tel. 041.5401356 • Fax 041.5402684</td>
</tr>
</tbody>
</table>

To preserve product warranty, functionality and product safety we recommend to use only original spare parts.

**Warranty**

Make reference to the national laws for any warranty conditions by contacting the national distributor (or directly the manufacturer IACER).
